

Polycom® Unified Collaboration for IBM Lotus Sametime and IBM Lotus Notes

On Demand Unified Collaboration with a single click –
Enabling an enterprise wide instant meeting experience

Benefits

Seamlessly integrate Lotus Sametime and Lotus Notes with Polycom's on demand video and audio collaboration solutions

Bring the highest quality audio, video and content to both the desktop and the conference room – Make collaborative decisions faster, no matter where your team is located. With Polycom's solution, enterprises can instantly and easily meet whenever they need to – wherever they are located

Ease of use – Lotus Sametime and Lotus Notes user interfaces integrate with Polycom's collaboration solutions. See who is online and available, then instantly turn a traditional communication exchange into an audio or video call and share content – just as if the participants were in the room

Leverage your existing investments – Maximize your existing investments by utilizing the equipment and network architecture that works best for you without worrying about protocol support or media devices. Polycom's standards-based solutions combine with Lotus Sametime and Lotus Notes to ensure a solution that supports your network today – and in the future

Integrating the power of IBM® Lotus® Sametime® and IBM Lotus Notes® with Polycom's award-winning audio and video collaboration solutions enables your enterprise to increase productivity and effectiveness.

Polycom's on demand solutions integrated with Lotus Sametime and Lotus Notes creates a high-performance workplace that enables businesses to implement new and efficient business models, efficient business processes, differentiated products and services and competitive innovation.

Communicating Has Never Been Easier

Polycom provides the industry's only fully unified, enterprise-grade, audio and video collaboration solution for Lotus Sametime and Lotus Notes, making it easier than ever to view your contact's availability and presence, and instantly see, hear and talk with customers, suppliers, partners and colleagues around the world. Unified collaboration has never been easier.

Single Click Unified Collaboration for Lotus Sametime and Lotus Notes

Instant audio, video and content collaboration sessions, with one or many, are simply a click away. Polycom's industry-leading audio and video endpoints and multipoint conferencing bridges integrate with Lotus Sametime and Lotus Notes to enable enterprise users to seamlessly collaborate with others from their desktop and conference rooms. End users can initiate an instant or future collaboration session using the interfaces and tools they are already familiar with including Instant Messaging (IM), email, and existing buddy lists.

Suddenly, with a single click you have enabled a high-performance workplace that, regardless of the location of its workforce, can instantly make collaborative decisions. Never before has the demand been so great on your business. Never before has the solution been so easy.

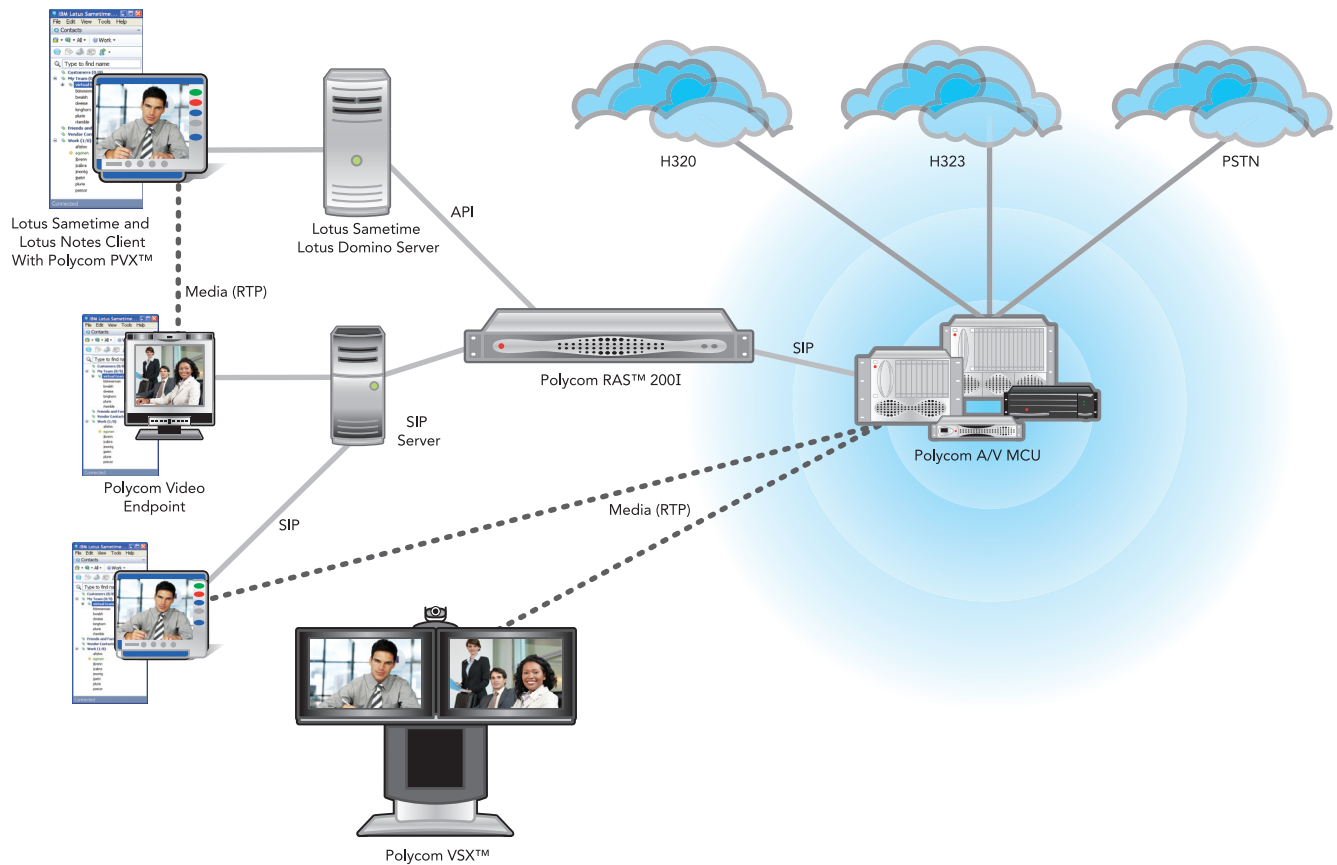

Make Great Things Happen With Polycom and Lotus Sametime and Lotus Notes

In today's Internet driven world, the ability to conduct real time communication and collaboration has become critical to an organization's survival. As the market leader in voice, video, data and Web solutions, our award-winning conference technology makes it easy for people to interact and maximize productivity – over any network, in just about any environment, anywhere around the globe. That's why more organizations worldwide use and prefer Polycom conferencing solutions. Because when people work together, great things happen. See how you too, can achieve great things with Polycom and Lotus Sametime and Lotus Notes.

VideoVoiceDataWeb
